

Class Assignment

Making Graphs

Find a partner. With your partner create graphs that clearly show the data from our opening survey as clearly as possible. You can find the data on the canvas page in the files section under datasets. I want you to make these graphs in notability on your iPad.

1. Create a display of the distribution of Lucky numbers
2. Create a display of the distribution of lucky numbers by gender
3. How much homework you do
4. A display that compares how much homework you do by drug policy opinion
5. Create a display of Political beliefs by gender
6. Do any of these displays lead you to believe that there are connections between the variables that are being compared?
7. Create a display of for the number of siblings describe the distribution (center, shape, spread, outliers).
